

6516209329.txt

I am a current (2 yr.) subscriber of Satellite Radio (XM) and listen several hours a day. I find XM's choice and variety of programming and broadcast quality to be above that of any AM or FM station in my area (Houston, TX.). That is the reason I am willing to PAY for the ability to listen to XM. I had to BUY the equipment; I had to PAY for installation and I PAY a monthly fee for this privilege. I strongly urge you to reject the NAB's petition 04-160 to limit XM's programming to what the NAB thinks is appropriate. Satellite radio is a service that we subscribers are willing to pay for in order to get what we want. Please let the free market decide what is broadcast on satellite radio.

Thank You,
Todd Buchholz
